

ARJUN SHARMA

Generative AI Developer

[City, State, Zip] | [Phone Number] | [Email Address] | [LinkedIn Profile URL] |

[GitHub/Portfolio URL]

PROFESSIONAL SUMMARY

Innovative **Generative AI Developer** with extensive experience designing and deploying **Large Language Model (LLM)** applications. Proven track record in building production-ready **RAG pipelines**, fine-tuning transformer models, and architecting **agentic AI systems**. Expert in integrating cutting-edge GenAI solutions into enterprise-grade environments to automate complex planning and execution tasks.

TECHNICAL SKILLS

- **Languages:** Python (Expert), SQL, Bash.
- **GenAI Frameworks:** LangChain, LlamaIndex, AutoGen, CrewAI.
- **Machine Learning:** PyTorch, TensorFlow, Scikit-learn.
- **LLM Ecosystem:** Hugging Face Transformers, OpenAI API, Anthropic API, Gemini.
- **Data & Storage:** Vector Databases (Pinecone, Milvus, Weaviate), PostgreSQL, MongoDB.
- **Techniques:** RAG Pipelines, Fine-tuning, Prompt Engineering, Reinforcement Learning (RLHF).
- **DevOps/Cloud:** Git, Docker, Kubernetes, AWS (SageMaker, EC2).

PROFESSIONAL EXPERIENCE

Lead AI Engineer | [Current Company Name]

[Month, Year] – Present

- Architected and deployed end-to-end **RAG pipelines** using **LlamaIndex** and **Pinecone**, reducing document retrieval latency by 40%.

- Developed **agentic AI systems** capable of autonomous task planning and execution, leveraging **LangChain** and custom **Python** tools.
- Fine-tuned open-source models (Llama 3, Mistral) using **Hugging Face Transformers** for domain-specific enterprise tasks.
- Designed advanced **Prompt Engineering** strategies to improve model accuracy and safety for customer-facing applications.

AI/ML Developer | [Previous Company Name]

[Month, Year] – [Month, Year]

- Integrated **OpenAI and Anthropic APIs** to build internal productivity tools, reaching 500+ active monthly users.
- Built and maintained scalable data pipelines for **Vector Databases (Milvus)** to support semantic search features.
- Collaborated with cross-functional teams to integrate AI modules into existing **production environments** using Docker and AWS.
- Utilized **PyTorch** for experimental model development and performance benchmarking.

KEY PROJECTS

- **Autonomous Enterprise Agent:** Built a multi-agent system that automates supply chain reporting by planning and executing data queries across various SQL and NoSQL sources.
- **Open-Source Contributor:** Active contributor to GenAI libraries, focusing on optimization of retrieval-augmented generation.

EDUCATION

Bachelor of Technology in Computer Science

[University Name], [City, India]
