

Since you are building a **Python/FastAPI/React** platform, you need a resume that actually has those keywords in it. If you upload a file with these details, your BERT model will recognize the "semantic similarity" to your Job Descriptions and give you a high score.

Copy the text below into a Word Document or Google Doc, then **Save as PDF**.

Kavyashree G P - Python Developer

Email: kavya@email.com | **Location:** India

Summary: Software Developer specializing in full-stack Python development. Experienced in building scalable web applications using FastAPI, React.js, and MySQL. Passionate about AI-powered tools and skill analytics.

Technical Skills:

- **Languages:** Python, JavaScript, SQL, HTML, CSS
- **Frameworks:** FastAPI, Django, React.js, Bootstrap
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git, Docker, AWS, PyMuPDF (fitz)
- **AI/ML:** NLP, BERT Embeddings, Reinforcement Learning

Projects:

- **AI-Powered Smart Interview & Skill Analytics Platform:** Developed a full-stack system using React and FastAPI. Integrated BERT-based text matching to compare resumes against job descriptions and extract missing skills.
- **E-Waste Management System:** Designed an interactive platform for WEEE regulation compliance in India.
