✉Kavyagp32@gmail.com | ☎7676791839 | Shivamogga

## Summary

Motivated and hardworking individual, seeking hands-on experience with a team of professionals. Strong understanding of core concepts, with good problem-solving, analytical, and teamwork skills. Eager to learn new technologies and contribute to delivering efficient and high-quality solutions.

## Skills

**Programming Languages:** C, Python, JavaScript, HTML, CSS, SQL

**Data Analysis & Visualization Tools:** Tableau, Power BI, Excel, Google Colab

**Development Tools & IDEs:** Visual Studio Code, PyCharm, Jupyter Notebook, GitHub

**Core Skills:** Problem-Solving, Debugging, Analytical Thinking, Teamwork, Communication.

## Projects

### AI Voice Assistant

- Developed a web-based Voice Assistant using HTML, CSS, and JavaScript with Web Speech API for real-time speech recognition and text-to-speech.
- Enables client-side tasks like greetings, telling time, and opening websites through an interactive, responsive interface.

### Online Pooling System

- Developed a secure online polling system with real-time voting, authentication, dynamic poll creation, and result visualization.
- Built using HTML, CSS, JavaScript, PHP, and MySQL with input validation and backend controls for accessibility and data integrity.

### Enhanced Drone autonomy in challenging Scenario using RL

- Designed and simulated autonomous drone navigation in complex environments using Reinforcement Learning with Python and TensorFlow.
- Focused on obstacle avoidance, dynamic path planning, and adaptive decision-making in Gazebo simulation without real hardware.
