

Shradda

AI/ML Engineer

📍 Bengaluru, Karnataka | ✉️ arjun.s_dev@email.com | 🔗 [linkedin.com](https://www.linkedin.com)

PROFESSIONAL SUMMARY

Detail-oriented Engineer with 3+ years of experience in designing and deploying scalable machine learning models. Proficient in building automated data pipelines and integrating AI services into enterprise applications. Seeking to leverage strong Python and MLOps expertise to contribute to high-impact AI/ML projects at **Accenture**.

TECHNICAL SKILLS

- **Programming:** Python (Mandatory Proficiency), SQL, C++
- **Machine Learning:** Linear Regression, Random Forest, SVM, Clustering, XGBoost
- **Tools & Frameworks:** Scikit-learn, Pandas, NumPy, Matplotlib
- **Cloud & DevOps:** AWS (S3, EC2), Docker, Git, Jenkins
- **Data Pipelines:** Apache Airflow, SQL Server, ETL Processing

PROFESSIONAL EXPERIENCE

Associate ML Engineer | TechSol Solutions, Bengaluru

January 2023 – Present

- Developed and optimized production-ready application pipelines for predictive maintenance, reducing system downtime by 15%.
- Automated data ingestion processes using Python and Airflow, handling over 1TB of raw data monthly.
- Collaborated with cross-functional teams to integrate image processing scripts for automated quality checks in manufacturing.
- Deployed machine learning models as REST APIs using Flask and Docker containers on AWS.

Data Analyst | Innovations Hub, Hyderabad

June 2021 – December 2022

- Cleaned and pre-processed large datasets to build customer segmentation models using K-Means clustering.
- Built interactive dashboards in Tableau to visualize model performance and business KPIs.
- Reduced data processing time by 30% through the optimization of complex SQL queries.

PROJECTS

Automated Image Classification System

- Built a system to categorize product images using OpenCV and Scikit-learn, achieving 92% accuracy.
- Implemented a production pipeline that automatically triggers model retraining when data drift is detected.

Customer Support Ticketing Bot (Traditional)

- Developed a rule-based chatbot using NLP techniques (NLTK) to route customer queries to the correct department.
- *Note: Built using keyword matching and intent classification (No LLM integration).*

EDUCATION

B.E. in Computer Science

Visvesvaraya Technological University (VTU) | *Graduated 2021*
